

VACCINE FREE:

Now What?

A 12-module
eCourse

DONNA POWERS is a Calgary-based homeopath specializing in children's health issues and families who choose to be vaccine free and almost vaccine free. The focus of this eCourse is to use homeopathy to help children heal from infectious childhood illnesses such as influenza, chicken pox, pneumonia, measles, mumps, whooping cough and more.

Learn how to:

- Use homeopathy effectively and safely in preventing and treating infectious illness at a very early stage.
- Help your child heal by supporting the immune system rather than suppressing it.
- Better understand who your child is so that you can personalize remedies rather than use one-size-fits-all.
- Build discernment to determine if and when additional conventional medical support is needed.

This 'evergreen' eCourse provides life-time access to valuable information so you can learn at your convenience - there's no such thing as 'too late'! Have access to the information ahead of time, so you can refer to it as needed, when illness occurs.

Enjoy a supportive blend of prepared elements for 'on-your-own' learning (audios, transcripts, slides, guides) as well as interactive, live elements (community forum, live call).

Join like-minded community to stay engaged, learning, and implementing.
