

# NATURAL IMMUNITY FUNDAMENTALS

## LECTURE A

**What Doesn't Kill You Makes You Stronger:  
Risks and Benefits of Viral Infections**

## LECTURE B

**Understanding the Immune System's Anti-viral  
Defenses: How Fever Suppression, Nutritional  
Deficiencies, Pesticides, and Food Additives Impair the  
Immune System**

## LECTURE C

**Understanding the Immune System's Anti-microbial  
Defenses: The Role of Vitamin D Signaling, Anti-  
Microbial Peptides, Neutrophils, Microbiome, and  
Bioactive Components of Breast Milk**

## LECTURE D

**Aluminum in Vaccines: Is It Good for You?  
An Immunologic Perspective**

## LECTURE E

**Injectable Health: Does Vaccine Immunity Last?  
Unfulfilled Goals and Unintended Consequences of  
Mass Vaccination**

## LECTURE F

**"Community" Immunity:  
Do Vaccine Mandates Safeguard Public Health?**

Dr. Tetyana Obukhanych holds a PhD in Immunology. She is devoted to growing the awareness and appreciation of the power of the immune system in preventing deadly disease outcomes, the power we often don't realize we have or know how to harness. She believes that scientific pursuit must be directed towards understanding the interconnectedness of all life forms, rather than at their eradication.

**During this full-day  
workshop with  
Dr. Tetyana Obukhanych,  
participants will gain a  
deeper understanding of  
how the immune system  
works in the context of  
vaccination and natural  
infection and will have a  
chance to discuss making  
vaccination decisions and  
daily care of the immune  
system.**
